GO BEYOND THE SOUNDS IN GAMING, MUSIC, AND MOVIES

Introducing the Next Level Racing HF8- Haptic Feedback Gaming Pad. Feel the immersive haptic experience with the eight strategically placed vibration zones that are powerful and localized for precision. The Next Level Racing® HF8 is optimized for different simulation games* for a unique in-game experience. The HF8 suits all gaming chair, racing/flight seat styles, and bodies comfortably for the best user experience. The HF8 includes plug-and-play PC software to provide you a multi-channel experience without the need of additional sound cards or amplifiers.

*Localization and intensity of each motor can only be adjusted through PC use and HFS software. Console players do not require the HFS software as the eight motors will work collectively through the audio output.

*cockpit & electronics not included

See it, play it, feel it with advanced haptic immersion at an affordable price

Eight individual vibration motors for a heightened level of haptic immersion

Enhanced experience on PC via Next Level Racing® HFS plug-and-play software using telemetry data

Works with gaming consoles using 3.5mm audio jack (headset/speakers required for playstation users)

Designed universally to fit all chair styles with comfort including gaming chairs, sim racing seats and flight seats

Advanced haptic for gaming but also adding immersion for VR, movies and music

Designed for sim racing, flight simulation and first-person shooter gaming

Next Level Racing® HF8 Haptic Feedback Gaming Pad
