

- **Rapid inflation in 45 seconds** The compressor features 27 mm high-precision alloy die-cast cylinders for rapid tyre inflation. The powerful airflow effortlessly meets your different tyre pressure requirements.
- **High-power magnetic motor** High output power and magnetic strength provide stable and reliable performance.
- **Comes with an air valve and extension hose** Includes a variety of accessories to cater to multiple needs.
- **Long battery life for extended standby time** The high-capacity lithium battery can re-inflate approximately 16 car tyres on a full charge. Convenient for general use without frequent recharging.
- **Auto pressure detection**  $\pm 1$  PSI\* precise tyre pressure detection. Set the required air pressure value or select the preset mode and inflation will stop once the desired pressure is reached, so there is no need to watch it during the inflation process. Convenient, worry-free operation.
- **Multiple preset modes** Carefully calibrated pressure values to match needs in different modes. Switch modes quickly and conveniently with a single button.
- **Real-time tyre pressure display** No risk of over-inflation with convenient monitoring.
- **Illuminate the area or use as a warning signal** Equipped with a white light ideal for illuminating large areas. Also features an SOS blinking/red light blinking mode for emergencies.

Model:	MJCQB07PQW	Rated Input:	5V $\overline{=}$ 3A
Inflation Pressure:	0.2–10.3 bar/3–150 psi	Operating temperature:	-10° C to 45° C
Net Weight:	905 g	Dimensions:	Approx. 152 x 100 x 63 mm (device only, excluding the high-pressure air hose)
Rated Capacity:	2500mAh		
Rated Energy:	27 Wh		
Charging Time:	Approx. 3.5 h
